Minimum requirements

Motorola Phone Tools requires Windows® 98, 2000, Millennium, or XP.

For Motorola Phone Tools to operate properly, please verify the following:

- A PC with a Pentium® II 233 MHz computer, connected to your mobile phone (with a cable, an Infrared port or a Bluetooth adapter).
- One available USB, or serial port if using a cable connection, or an active Bluetooth adapter, or a fully working Infrared port.
- Local hard drive with 120MB free space.
- Mobile phone or Device that is compatible with Motorola Phone Tools.
- Data/fax option included in the subscription contract with your cell phone operator (to allow fax and e-mails transmission and reception).
- High speed data networks (GPRS, CDMA 1X and WCDMA) options included in the subscription contract with your mobile phone operator (for high speed e-mail and Internet use on the mobile phone network); data service is a network and subscription dependant feature that may not be available in all areas.

  Please contact your wireless service provider for details.
- Minimum active memory: 32MB of RAM under Windows® 98 and Millennium, 64MB of RAM under Windows® 2000 and XP.

Before Installing

Screen Shots

The screen shots in this guide correspond to the use of Motorola Phone Tools in a Windows XP environment. When running the application in other Windows operating systems, the aspect of the screens may change. This will not impair the software's functionality.

Online Help

Motorola Phone Tools has a context sensitive online help that can be accessed by clicking the **Help** option or by pressing **F1** on your keyboard. Complete information on how to use Motorola Phone Tools can be found in the help files.

Technical Support

Technical support information for Motorola Phone Tools is available on the BVRP Software Web site at the following address:

http://www.bvrp.com/customers/motorola/

Installing Motorola Phone Tools

Important!

Before connecting the device to your PC, you need to install the software.

To install Motorola Phone Tools on your hard drive, insert the CD-ROM containing the program in the appropriate drive. When installing Motorola Phone Tools from the CD-ROM, the installation process starts automatically.

Should the installation program not start, execute the following instructions:

1. From the **Start** menu (accessible from the task bar), select the **Run** command.
2. Select the drive that contains the CD or type **D:SETUP** (**D:** represents the CD-ROM drive).
3. To run the file, click **OK**.

An installation wizard will guide you step-by-step through the installation process, prompting for information where needed. During the installation procedure, the content of the CD-ROM is copied onto your hard drive and a program group is created to hold the application icons for Motorola Phone Tools.

After installation, the online registration wizard is automatically launched (see *Online registration*, page *12*). The registration is necessary to benefit from the guarantee, the technical assistance, and free upgrades.

Depending on the operating system, when the installation process is completed, the installation wizard asks you to restart your computer so that all system changes take effect.

The **Add a shortcut to the desktop to start the program** box is checked by default. If you prefer to start Motorola Phone Tools from the **Start** menu in the taskbar, remove the check. If you keep that option, the following icon can be added to the desktop, as a shortcut, to start the program:

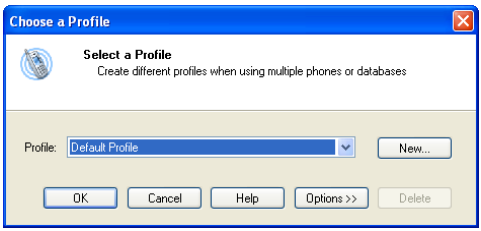

Motorola Phone Tools

At first launch, the software automatically launches Live Update and checks for any software updates.

Mobile Device installation and configuration

Important!
Please do not connect your mobile or your mobile device to your PC until instructed to do so by the Motorola Phone Tools software installation wizard.

1. Select your user profile.

2. Normally, your software has been setup to work automatically with your mobile phone or device, so this step is automatic. However, if the connection type is not detected, the **Phone Setup Wizard** window will be displayed:
3. Select the connection type you will use to connect your phone to your PC.

4. Click on Next. The following screen appears :

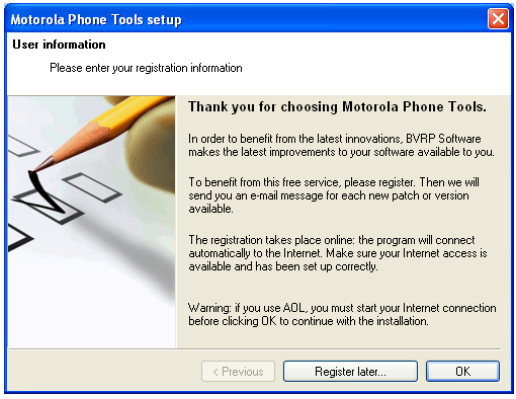

5. Connect your phone to your PC. Your phone will be detected and setup automatically.
   The application will be launched at the end of the installation process.

Online registration

To benefit from the guarantee, the BVRP Software technical assistance, and free upgrades, register online with our services. The online registration wizard is automatically launched at the end of the installation process. Simply follow the instructions displayed on the screens.

Important!
To ensure an automatic Internet connection, check that your Internet access is available and properly set up.

If online registration could not be completed during installation, you can also register at any other time using **Menu** > **Help** > **Online Registration...**

Uninstalling Motorola Phone Tools

1. In the Windows task bar, click the **Start** menu and select **Control Panel**. The Control Panel window opens.
2. In the list, double-click the **Add/Remove program** option.
3. Highlight the Motorola Phone Tools program group and click the **Change/ Remove** button.
   The uninstallation process starts.

Motorola Phone Tools Main Window

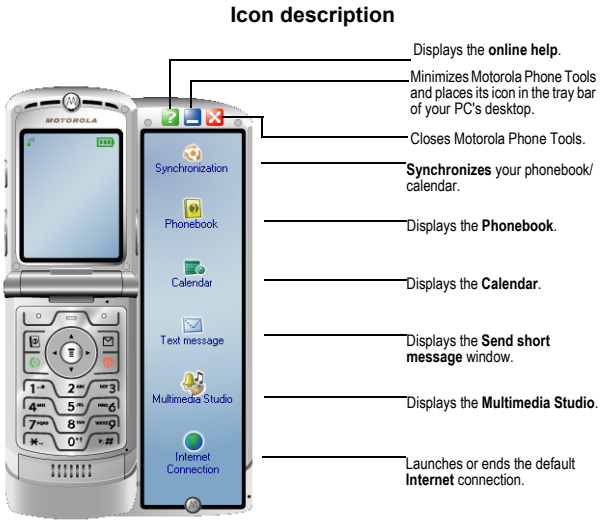

With Motorola Phone Tools you can share the information contained on your PC with your mobile phone. When your mobile phone is connected to your computer, you can perform the following operations:

- Place and receive calls.
- Send and receive emails and SMS.
- Synchronize your phonebooks and calendar.
- Launch an internet session*.
- Send MMS*.
- Transfer video clips* from PC to phone and *vice versa*.
- Send modified music clips* to phone from PC.
